

To Whom This May Concern:

We were delighted to hear that our son was a candidate for the Pre-K Counts program this year. Our son's birthday falls in December, therefore he was unable to attend Kindergarten this school year. The current program is facilitated by two wonderful, caring and educated teachers whom we believe has made a difference in our son's early education. The program has not only helped him be more successful academically, but also socially and has taught him responsibility. Prior to this school year, my son attended Pre-School three days a week. The five day program has played a tremendous role on him being prepared for his transition to a regular school schedule. The teachers have kept us informed with regular updates reviewing our son's progress, the teaching methods and current weekly activities. We truly believe that our son will be more prepared for the transition to Kindergarten having participated in this early learning program.

Thank you!
